

MISS DISTANCE INDICATOR AS-136/12U

The AS-136/12U is intended to be integrated to the inside of a hard target from 60mm in diameter and upwards. AS-136 has same performance as other MDI from the AS-1xx/12U series

GENERAL		DATA	
Power supply	Rechargeable NIMH battery pack	Scoring capacity	6000 rounds per minute, momentarily more
Battery operation time	min. 4 h at +25°C	Scoring calibers	5.56 mm to 5"+ and missiles
Supply voltage	+12 VDC	Distance accuracy	±1 m or max ±15% (on the average) of the actual miss distance, whichever is the greatest
Operation temperature	-30°C to +55°C	Angular accuracy	±15°
Storage temperature	-40°C to +70°C		
Weight	Approx. 0.4 kg. Depends on target size.		

TRANSCEIVER	
Carrier frequency	Frequency within 330-473 MHz
Channel separation	12 kHz
Radiated power	typ. 1.0 W
Link type	Half-Duplex
Data transfer rate	Radio 9600 bps
Optional	Encryption AES128
